Portfolio: lanybcr.github.io

SUMMARY

Architect and urban planner with a degree in Systems Analysis and Development, moving my career toward data analysis. I use Python (Pandas) to clean, process and analyze real datasets, and I build dashboards and end-to-end pipelines: collection, processing, validation and visualization.

Architecture gave me an eye for territory, cities and how people behave, and UX taught me to present numbers so that decision-makers can understand them. I document my method decisions and keep a clear record of what was removed or adjusted in the data.

SKILLS

Analysis and languages: Python, Pandas, MySQL, Jupyter

Visualization: Power BI, Matplotlib, HTML dashboards

Data preparation: cleaning, validation, method documentation, inflation adjustment (IPCA), IBGE data

Web and UX: HTML, CSS, JavaScript, UX design, web accessibility

PROJECTS

Agribusiness analysis in Pará, Brazil (2026)
Dashboard built on IBGE data from 2016 to 2025: 44 crops and 143 municipalities, values adjusted for inflation (IPCA). At 2025 prices, production value grew from R$ 15.4 bn to R$ 38.4 bn. Python, Pandas, HTML.

EDUCATION

Systems Analysis and Development — Estácio
2024 – 2026

UX Design — Alura
2022

Bachelor's in Architecture and Urban Planning — Universidade da Amazônia
2016 – 2020

CERTIFICATIONS

- Build Web applications with JavaScript
- Web accessibility: create inclusive designs
- Programming logic: JavaScript
- UX Usability: make your mobile users' lives easier
